Logistics Company

2023 PROFILE BOOK

Since 1997

ABOUT US

OUR HISTORY

Masdar Transport Corporation was established in Riyadh in 1997 as an establishment to transport refrigerated and frozen goods inside and outside the Kingdom of Saudi Arabia. Because we knew that the land transport and logistical support industry is the fastest growing among the components of the Saudi economy.

The Kingdom of Saudi Arabia is fully dependent on road transportation for the distribution of locally produced or imported goods and commodities. In view of this vision and because we are looking for continuous growth, Masdar has applied the latest globally recognized systems in practice from systems of safety to quality and efficiency, and from an administrative point of view we have all the support from our administration using the latest systems and modern programs to reach the highest level of perfection to serve our customers with a team that is fully committed to the task assigned to it ensuring the finest support to serve our partners and customers.

TRACKING & FLEET MANAGEMENT SOLUTIONS

Vehicle Tracking

In cooperation with Saudi Tracking Solutions we provide **VEHICLE TRACKING SOLUTIONS** that you can use to improve your business by tracking your fleet, you will receive regular updates on the vehicle location, speed and direction of travel. In addition to tracking your employees, this information can be used for planning and coordination purposes, boosting your ability to serve customers in the best way possible.

Geofencing zones

Observe speed limits

Control Fuel Waste

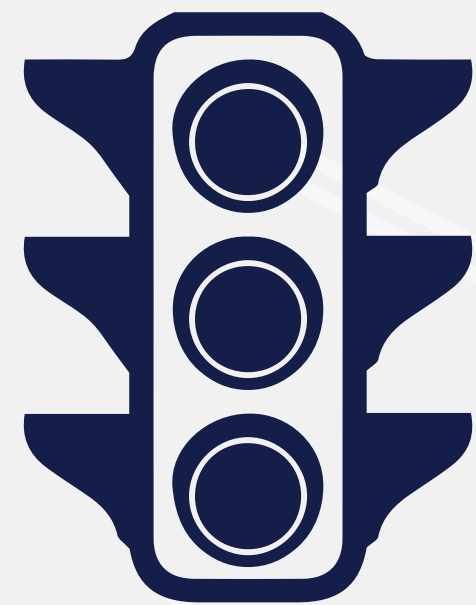

Monitor Driver Behavior

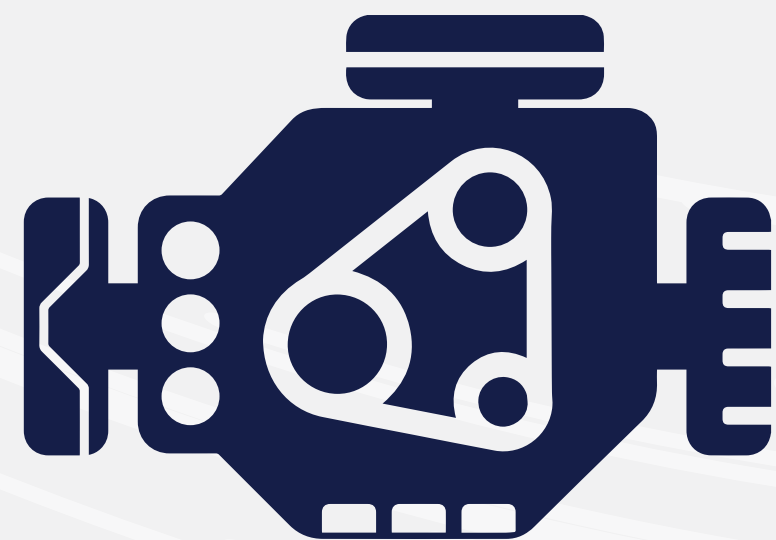

FLEET MANAGEMENT

The main function of FLEET MANAGEMENT SOFTWARE is to gather, store, process, monitor, report on and export information. Information can be imported from external sources such as gas pump processors, territorial authorities for managing vehicle registration financial institutions, insurance databases, vehicle specification databases, mapping systems and from internal sources such as Human Resources and Finance.
